SENATOR W. E. HAAS

Delaware Solon Would Protect Creditors of Stores.

TELLS US THE REASON WHICH MOVED HIM

WHY HE CALLED OFF BALL

Wilson Opposed to Turkey Trot and Other New-Fangled Dances.

Washington, Jan. 21.—President-elect Wilson's disapproval of such modern dances as the turkey trot, the grizzly bear and the bunnyhug, was one of the reasons which led to his request that the inaugural ball be called off. This came out at a meeting of the inaugural committee. A member of the committee, an intimate friend of the Wilsons, explained to the committee that the governor had been very unfavorably impressed with articles that had appeared in the newspapers about the likelihood of these new-fangled dances being tried at the inaugural ball. This, taken in connection with the expense the ball would impose on the government, is said to have influenced Mr. Wilson to his decision.

Sleuth Killed by Auto Bandit.

Chicago, Jan. 21.—Detective Peter Hart was shot and killed by an alleged automobile bandit whom he had gone to arrest at a flat at 1617 Washington avenue. The robber, who escaped, wrested Hart's revolver from his hands and shot him with it.

LEATHER CONCERN HEAD IS ROASTED

SUES FOR DIVORCE

Wife Alleges Unusual Acts of Cruelty On Part of Her Husband.

New York, Jan. 21.—Arthur Einstein, vice president of the Einstein Manufacturing company, one of the largest leather concerns in the city, is accused of unusual acts of cruelty to his wife in a complaint filed in the supreme court for a separation. The plaintiff, Mrs. Manuella N. Einstein, alleges that among other things her husband has persisted in holding her out to the world and to his family and friends as his mistress, because she is not of his faith and his parents were opposed to his marriage to one not a Hebrew. Mrs. Einstein asks \$150 a week alimony and \$1,500 counsel fees for herself and three-year-old daughter, Hortense. Mrs. Einstein's petition shows that her husband is now in Dr. Packer's sanitarium, and she says she believes he has lost his reason because of his habits.

WETS AND DRY VIEW EACH MOVE WITH SUSPICION

SLEEPERS SEEN
BY EACH SIDE

Wet and Dry Bills Dissected at the License Hearing.

COX AN INTERESTED AUDITOR

Superintendent Wheeler of the Anti-Saloon League and Secretary Andree of the State Brewers' Association the Principal Speakers—Orators and Arguments Reserved For the Second Hearing.

Columbus, O., Jan. 21.—Charge that the Acker bill, the offering of the krys, contained sleepers designed to prohibit, not to regulate, the liquor traffic, and the counter charge that House Bill No. 4, the bill initiated by the brewers' petition, contained sleepers designed to nullify the constitutional restrictions of the traffic and even to weaken the enforcement of the present local option laws, marked the first clash over the method of licensing saloons at the first public hearing before the joint temperance committees of the senate and house in the hall of the house.

Governor Cox was an interested auditor, sitting with Speaker Swain at a reporter's desk. Judge R. M. Wanamaker of the supreme court was present. Because of the inclemency of the weather the attendance was not much greater than the number of ticket holders, and no overflow meeting was held as expected. Secretary Percy Andree of the State Brewers' association made the only speech for the brewers' bill. Superintendent Wayne B. Wheeler of the Anti-Saloon league assumed the burden of the attack upon it, while Judge Samuel L. Black briefly protested as a judge of the juvenile court against the provision of the brewers' bill which seeks to relieve the saloon-keeper from responsibility for selling to children and makes the child responsible. Both sides reserved other orators and arguments for the second hearing tonight.

Secretary Andree leaned strongly on the recommendation by Governor Cox in his message of the state board system for justification of the brewers' bill. He admitted that the state board plan would not eliminate the liquor question from state politics, but said it would take it out of community politics. He declared the bill he advocated would also render effective the "legion of regulatory and prohibitory laws" now in existence. These were ineffective, he said, because there was no such penalty as putting the bad saloonkeeper out of business, which the wets proposed.

A crack at the high cost of living was taken by Senator Cook of Hamilton county in the legislature when he introduced a joint resolution calling upon congress to enact legislation which will permit the exportation of meats and all other food products only when they are selling at reasonable prices in this country and to prohibit their exportation when the average retail price of foods is out of proportion to the average wages.

FEAR SUFFRAGETS

Retaliatory Measures Threatened if Franchise Bill Is Lost.

London, Jan. 21.—There are rumors about London as to what the militant suffragets intend to do when, as they fear, Sir Edward Grey's amendment to the franchise bill giving votes to women may be defeated in the house of commons on Friday. The dislocation of the electric streetcars by tampering with the underground conduits and a wholesale dislocation of the telephones are the mildest retaliatory measures hinted at.

Sir Edward Grey's amendment to the franchise bill would eliminate the adjective from the specification "male person" to whom the bill as drafted would give the vote.

AFTER HARD COAL TRUST

COAL RATES HELD
TO BE EXCESSIVE

Interstate Commerce Commission to Make Investigation.

DEFENSE'S COUNSEL SEE LANE

Rates on Anthracite Said To Be Based On Agreement Between the Railroads and the Coal Companies They Control and That Independent Companies Operate at a Distinct Disadvantage.

Washington, Jan. 21.—Attorneys representing the anthracite coal-carrying roads of the country conferred with Commissioner Lane of the interstate commerce commission in connection with the investigation the commission has instituted into the relations between the railroads and the coal companies. Under a decision of the United States supreme court the railroads were prohibited from owning directly coal mines and operating them, but it has developed that the railroads control the mine companies through stock ownership.

Complaint has been made by the commission that the rate on anthracite are based on agreement between the railroads and the companies they control; that these rates are excessive and that the independent companies operate at a distinct disadvantage against companies whose stock is controlled by railroads. The hearing was held preliminary to the taking of testimony in the investigation, and it was decided that the commission would begin the actual taking of testimony in New York on Monday, Jan. 27.

When the taking of testimony begins in New York it is expected that interesting matter will be developed with reference to the fixing of foreign rates on anthracite coal and as to the extent to which the anthracite mines by the carriers enters into the prices of the coal to the consumer.

The following railways were represented at the conference: The Pennsylvania, the Lehigh Valley, Delaware, Lackawanna & Western, Erie, Central of New Jersey the Delaware & Hudson, the New York, Susquehanna & Western, Northern Central railway, the Wilkesbarre & Eastern and the Pennsylvania company.

SHAW STILL ON JOB

Leslie M. Flashes a Contract That Expires in April, 1914.

Philadelphia, Jan. 21.—Leslie M. Shaw, genial and smiling, was at his desk in the First Mortgage Guaranty and Trust company at his usual hour, despite the fact that the directors had refused to re-elect him president and had chosen Wharton E. Harris as his successor. Mr. Shaw flashed a five-year contract stipulating that he is still in the bank's employ, and will be, if the contract holds, until April 15, 1914, at the annual stipend of \$15,000 a year.

SETTLED OUT OF COURT

Suit of an Actress For Ten Thousand Against Bank Clerk.

New York, Jan. 21.—A suit for \$100,000 for libel, brought by Edith Tallafiero, an actress, against Dean E. Larrabee Weaver, clerk in the banking house of Spencer Trask & Company and son of a Presbyterian clergyman, was settled out of court. Miss Tallafiero based her action on a letter written by Weaver to his wife, Florence S. Weaver, who is suing for divorce, in which he told of taking automobile rides with the actress. Weaver admitted this statement was false. The letter became public when Mrs. Weaver filed it on an application for alimony.

Saved
After All
Hope Had
Vanished

ENTOMBED MEN RESCUED

Thirty Miners Dragged Up the Air Shaft to the Surface.

Coshocton, O., Jan. 21.—After being entombed in Tyndale Mine No. 1 of the Columbus Coal and Mining company, 30 miners were rescued through an air shaft. Continued rains for the last week softened the earth at the mouth of the mine entry and the added weight crushed down the timbers. A driver, after discovering the cave-in, summoned aid and, securing a rope, lowered it down the air shaft and one by one dragged the miners to the surface. Some of the men rescued were faint from exhaustion and foul air.

Carnegie's Gift to Cornell.

Ithaca, N. Y., Jan. 21.—It was learned that Andrew D. White announced at the dinner given in his honor in New York that Andrew Carnegie had given him \$25,000 to be used at Cornell university in any way he saw fit. Although Mr. White has been anxious to have an organ placed in the new auditorium, Dr. White has decided that the sum should be given to the student loan fund, to which students in need of financial assistance apply.

Foundation Bill Passed.

Washington, Jan. 21.—By a vote of 152 to 65, the house passed the Peters bill, granting articles of incorporation to the Rockefeller foundation of \$100,000,000. The measure now goes to the senate, and the indications are that it will be passed by that body and become a law before the adjournment of this congress.

RADICAL CHANGE IN PRESENT LAW MAY CHECK 'EM

MAIN
POINTS
SHOW
FORTH

WHAT GOOD ROAD
ADVOCATES DEMAND

Hudson and Hite Bills Embody the Main Points.

Columbus, O., Jan. 21.—What will constitute largely the complete program of the good roads advocates of the state in the way of legislation asked for at the hands of the present general assembly is included in the bills introduced by Senator Hudson, chairman of the good roads committee of the senate, and Representative Hite, heading the corresponding committee in the house. The bills provide for the levying of a tax on the property of the state to create a fund with which to construct, improve, maintain and repair the intercounty highways and main market roads of the state and the manner in which it is to be expended; the employment of prison labor in this state-aid work and the codification of all the present road laws into a single clearly-defined and workable statute.

The measure by which a tax levy is to be assessed differs in the two branches, that introduced in the senate declaring for a levy of but one-half mill, while that in the house follows the Stillwell amendment presented at the session of the Ohio constitutional convention, and favored by the labor advocates of the state. It raises the levy to three-quarters of a mill and would increase the amount of money available about \$500,000 annually. This follows the ideas of Mr. Hite as to the proper rate of assessment. In all other respects the bills are identical.

None of the measures touches the improvement or maintenance and repair of the 80,000 mile of wagon roads outside of the intercounty highways and main market roads. The money for this work is to be raised by the counties and townships as at present, and then supervision is left to the county commissioners and township trustees.

The construction, maintenance and repair of the main market roads is to be done under plans adopted by the state highway commissioner and approved by the governor, and does away with the necessity of petitions being filed as in other road improvements.

TO PROBE 'PHONE AFFAIRS

Interstate Commerce Commission Will Take Up Complaints.

Washington, Jan. 21.—The interstate commerce commission will make an investigation of the affairs of the American Telephone and Telegraph company. The action of the commission is based on a letter sent to the commission by Attorney General Wickersham. This letter set forth that complaint has been made to the department that the so-called trust was endeavoring to purchase competing lines, was discriminating against the Postal Telegraph company in favor of the Western Union, was maintaining exorbitant telephone rates in sections where there was no competition and was refusing connections to independent companies.

MEASURES BEAR
O. K. OF WILSON

Prohibit Formation of Holding Companies In New Jersey.

PRISON PENALTIES PROVIDED

No Interference Contemplated With Existing Holding Companies and Corporations, as Now Constituted, but Limitations Are Placed On All Future Activities—Organization of Monopolies Expressly Prohibited.

Trenton, N. J., Jan. 21.—Radical changes in the corporation act of New Jersey, designed to prevent hereafter the formation of holding companies, the issuance of stocks not based on bona fide values and the formation of corporations for the purpose of restraining trade and creating monopolies, are provided for in a series of seven bills introduced in the legislature. These bills are frankly acknowledged to be administration measures and to have the full approval of Governor Wilson.

They contemplate no interference with existing corporations and holding companies as now constituted, but they explicitly set forth in great detail limitations on future activities and the conditions under which new corporations may be formed.

For the first time in the history of New Jersey prison penalties are provided for individuals who in any way violate the provisions of the new laws, and in addition to this it is stated that the entire corporation may be dissolved by the revocation of its charter if any of its members fail to fulfill the obligations imposed upon him.

A striking feature of the bills is that they plainly give permission for a business to increase in size by the acquisition of other concerns engaged in a similar business, but prohibit the organization of holding companies. The method provided for such increase is by actual purchase, either for cash or for stocks, but there is prohibition of all the various ways of putting watered stock on the market as a result of such purchase.

The first of the bills defines trusts and expressly prohibits the organization of monopolies.

The crimes act is amended by making it a misdemeanor for any persons to organize any corporation under the laws of this state with intent to promote or conduct any object which is unlawful or intended to be used in restraint of trade or acquiring a monopoly.

Stung,
By Gosh!

LAUGH ON THE POLICE

Noted Thieves of Russia Hold a National Convention.

Moscow, Jan. 21.—A regular organized convention of the noted thieves of all Russia has been held, and their first official act was to pass a resolution on the stupidity of the Russian police.

Learning, through spies, of the proposed foregathering, the police picked the wrong place and arrested guests at a wedding feast. Details of the story became public, to the deep chagrin of the police.

The thieves held their convention in a restaurant in an obscure quarter and formed a strong organization for co-operation and mutual aid. Their secretary sent a copy of their resolution to the prefect of police.

A MIXED VERDICT RETURNED BY JURY

Verdict in Case of Chestnut Against Chestnut Gives All of Property to Defendant, But "Recommends" That Most of It Be Given to Plaintiff—New Trial Will Be Asked For.

The jury in the case of George Chestnut against Joe Chestnut, Monday afternoon returned a verdict in favor of the defendant, with a "recommendation" attached giving most of the property to the plaintiff, the verdict being a most unusual one.

The case in question started on Sept. 12, 1911, and the value of the goods claimed by the plaintiff was \$21.50. In Justice Craig's court a verdict was rendered in favor of the defendant, whereupon the case was carried up to Common Pleas court.

The articles mentioned by the plaintiff, and which he wished restored to him consisted of one spring wagon, one double barrel shot gun, one oak kitchen table, one pair double-boards for road wagon, 1 pair double-trees and one neck yoke.

Following is the somewhat confused verdict returned by the jury:

"We, the jury in this case, being duly impaneled and sworn January 20, 1913, do find that at the commencement of this action the defendant had the right of property in the goods and chattels in the petition described, and was entitled to the possession thereof; and we do assess damages against the plaintiff, by reason of the premises, at . . . dollars.

"But we recommend that plaintiff be given possession of double-trees, neck yoke, table and sideboards and end-gate.

ALBERT HANKINS,
Foreman.

Rankin & Rankin attorneys for the plaintiff, have announced their intention of filing motion for a new trial and asking that the verdict be set aside.

East End Sewer Causes Trouble

A great many persons residing in the east end, where cellars are drained into the large sewer which crosses Columbus avenue near the east end of the old fair grounds, and crosses Washington avenues near the intersection of Elm street, have been annoyed for a week or ten days by back water in the cellars of their homes.

In a number of instances the water was several feet in depth, and furnaces were put out of commission in short order and have been useless for many days.

However, the water has almost entirely receded again, much to the relief of all who have been annoyed by the flood.

Adjustment Sale An Important Event

We take pleasure in announcing to our readers this week the fact that the well known firm of W. A. Tharp & Company, dealers in Clothing and Furnishings, has decided to hold what they term an Adjustment Sale of their stock of Men's and Boys' Clothing and Furnishings, which promises to be the most phenomenal sale ever held in this vicinity. They have an immense stock of goods on hand, that must be sold at once in order to effect a readjustment of their business in the very near future. This makes a prompt reduction of the stock at least one-half necessary. Accordingly, startling slashes in prices have been made and at 9:00 a. m. Thursday, January 23, this big money-saving opportunity will become a reality.

To stimulate early buying the early comers will be given cash prizes. A big crowd is sure to be on hand at the Opening Hour.

The Herald is glad to call this sale to the special attention of its readers, knowing full well that everything will be carried out exactly as advertised and that the public will receive even more than the advertisement leads them to expect.

The store will be closed all day Wednesday to enable them to remark the goods and arrange the stock for the quick handling of the crowds.

Don't fail to be on hand at the Opening hour to receive your share of the prizes.

Commission Named For Prison Reform

Special to Herald.

Columbus, Ohio, Jan. 21.—Governor Cox appointed a commission to draft plans to start a prison reform system in Ohio.

The members appointed are Doctors A. P. Shephard, Dayton, Ohio; J. A. Leonard, Mansfield reformatory; H. R. Cooley, Cleveland and Ruthford A. Platt, of Columbus.

MARRIAGE LICENESS

General Bass, 33, hod carrier, and Susie Hickman, 29. Both colored.

DEATHS

LEWIS.

Mrs. Milton Lewis, of Atlanta, died Sunday night about nine o'clock. She is survived by a husband and several children. Funeral services were held Tuesday afternoon at two o'clock, in the New Holland M. E. church.

Burial was made in the New Holland cemetery.

HARRIS.

Mrs. Thomas Harris, of New Holland, who died at her home late Saturday night, was buried in the New Holland cemetery Tuesday afternoon, funeral services being held at the residence. She is survived by a husband.

RECOVERING FROM OPERATION.

Miss Clara Bell Brown, of Martinsville, is recovering nicely from a recent operation at the Hodson hospital. The operation was of quite a serious nature.

Classified advertising pays big.

Placing Coping On Temple Walls

Within the next day or two the walls of the Masonic Temple will be completed, and at the present time only a small section remains to be finished. As the finishing touches are being placed on the front wall, its attractiveness becomes apparent. The huge emblematic stone bearing the square and compass adds much to the attractiveness of the walls, and is located in the center of the wall near the top.

A large portion of the roof has been laid, and the remainder will be laid this week or first of next.

The front wall of the new Hunt block has been rebuilt, and the plan somewhat changed to make it stronger.

Tax Books Close Next Tuesday

Next Tuesday is the last day for paying taxes, and quite a large amount of money remains to be collected during the few remaining days.

Monday was a heavy day at the treasurer's office, and some \$7,000 was collected.

Tuesday morning Deputy Duff went to Jeffersonville to collect taxes at that place.

Another Car Of Paper In

Another car load of print paper, over 44,000 pounds, arrived in this city for The Herald Publishing Co. Monday evening and the work of unloading and storing it commenced Tuesday.

This is the second car-load lot of white paper received by The Herald within the past few months, and the tens of thousands of big white sheets of paper will pass through the press and, bearing the very latest general and local news, will be sent out to The Herald's ever increasing list of readers and keep them posted on what is taking place.

Teaching Sailors to Swim.

Rear Admiral Schroeder, while training the men in his fleet down in Guantanamo bay, has discovered that some 2,500 of them don't know how to swim, and he reports to Washington that he has taken measures to remedy this defect in their nautical education.

It seems rather remarkable that sailors, with large amounts of water always conveniently near, should lack an art which so many landmen possess of which a sailor is at any moment likely to be in more or less desperate need. It is a fact, however, that seamen, as a class, swim far to seek, for when one comes to think about it, a ship in motion is about the worst thing in the world from which to go in swimming, and the sailor's opportunities for taking to the water, except by an accident, which, with good reason, he avoids as long as he can, are much less numerous than those of the man ashore. Out at sea there is none at all, and while in port the sailor is otherwise occupied—chiefly in spending hard-earned money.

Shooting at Storms.

Another popular belief has been rudely shaken as the result of a scientific investigation. There has not been much heard of late about producing rain by the discharge of explosives, but the belief in the efficacy of cannon in breaking up hailstorms has been more persistent. In the vine-growing regions of France and Italy the injury done by hailstorms is a very serious matter, and the firing of a cannon has come into quite general use as a means of prevention. But now comes from United States Consul Sharp, of Lyons, a series of articles giving the conclusions arrived at by the French department of commissions of meteorology showing its disbelief in the efficacy of the practice. It does not find that the firing of cannon is at all beneficial for the purpose of dispersing hailstorms.

PEARLS AND PIGS.

No sane man would cast pearls before swine in these days; hogs are too valuable to take chances of choking them.

The best results are gained when all parties to a controversy put forth all their powers in the direction of that which seems to them logical and right. Out of such contentions right and truth emerge.

WANTED—A MAN!

We want a man in your town to open a branch of **KNOX, THE TAILOR, CO. LUMBUS, OHIO**, to sell our **POPULAR \$15.00 and \$20.00** made to measure suits and overcoats. We want a man who is alive to the bigness of this opportunity, who will go into the work with spirit and energy and stick to it. If you are the man, grasp this proposition without investing a penny for stock. You merely rent a small, well-located store in your town, we will supply the stock to fit out the store and show you how to start a paying business.

A Store in Your Town Will Make Money

Our simple plan does it. We back you with our vast experience, our enormous capital, **OUR UNQUESTIONABLE REPUTATION**. If you are the man possessing ambition, intelligence and a hustler and possess the above qualification, write us. All answers treated strictly confidential. Address for further particulars,

Knox, The Tailor

DEPAT C.

COLUMBUS, OHIO

Washington On Main Highway

Washington is on one of the across-state highways advocated by the good road enthusiasts in the plan to rebuild certain pikes and bring them up to the highest standard.

There are ten of the inter-county highways, each being designated by number, and Washington is on the Cleveland to Cincinnati route or No. 10.

This road touches Medina, Wooster, Mt. Vernon, Columbus, Washington C. H., Wilmington and Morrow, and in this county, if the bill passes, it will be the Columbus pike and Sabina pike.

Difference Between Savages and Races Long Civilized.

Prof. Frederick W. Mott, lecturing before the Royal Institution of Great Britain on "The Brain," said that although in 88 per cent. of the cases in which the brains of great men had been weighed the weight was above the average, brain weight itself did not always mean brain quality.

When there was lack of the functioning tissue, the lecturer explained, the structural material might receive more than its normal share of nourishment and the extra weight be due to overgrowth of "brain scaffolding." This accounted for the very large and heavy brains sometimes found in congenital idiots. Pointing out that the brain weight of a race long civilized surpassed that of aborigines, the lecturer stated that whereas the ordinary European hospital patient had a heavier brain than a savage, the Chinese coolie laborer's brain, developed by centuries of use, weighed 1 1-2 ounces more than of the European hospital patient.

Referring to the relative brain weights of Caucasian men and women, Prof. Mott said that the female brain had a good start, weighing nearly 1 1-2 ounces more than the male brain at birth. In adult life, however, the average man's brain weighed about 5 1-2 ounces more than the woman's.

The average weight of the European male brain was 2 pounds 15 ounces 9 drams to 2 pounds 16 ounces 9 drams and of the female brain 2 pounds 10 ounces 11 drams to 2 pounds 10 ounces 14 drams. Among savages there was not this difference, since in the struggle for existence the female had to apply her brain as fully as the male, hence it has developed at practically the same rate.

Utilizing Volcanic Steam.

An Italian engineer, Signor Ginori-Conti, has put into practice the curious idea of utilizing the steamjets from the natural vents called suffioni for driving motors. Suffioni abound in certain parts of Tuscany, and in other ancient seats of volcanic energy. Jets of water vapor, at a high temperature, are discharged from them with great regularity. Some of the suffioni in Tuscany, according to Signor Ginori-Conti, have remained invariable in their discharges during 15 years that they have been under observation. He thinks that a considerable amount of mechanical energy can be derived from these sources. One of the principal difficulties in the utilization of this natural steam arises from the corroding acids that abound in it.

Interesting Case In Common Pleas

A case of more than passing interest is now on trial in Common Pleas court, wherein the plaintiff, Lydia Estel brought suit against Louis F. Stolzenberg for \$1,000 damages as the result of injuries sustained by being attacked by a vicious dog owned by the defendant.

The parties concerned in the suit lived on John street in this city, and the plaintiff alleges that the dog attacked and badly lacerated her arm. Gregg & Gregg represent the plaintiff and Rankin and Rankin are attorneys for the defendant.

WOMAN'S RELIEF CORPS.

The regular session of W. R. C. will be held Thursday, Jan. 23 at 2 p. m. The attendance of members is urgently solicited. By order
EMMA CRAIG, Pres.
EMILY BALDWIN, Secy.

The Useful Rat.

From letters received it would seem possible to make out quite a good case for the rat. Not only has he served as food—Dr. Kane on his Polar expedition attributed his comparative immunity from scurvy to the soup made from the rats which his servant shot with a bow and arrow—but Mr. Frank Buckland has suggested that their skins are eminently suitable for glove-making. At any rate, rat-skins have sometimes been used as clothing, for we read of a lady at Glasgow who had a pair of shoes from rat-skins, which were as soft as the finest kid, while by way of a freak a complete suit of rat-skin was once made by a Cornish miner.

The Jamaica Firefly.

The Jamaica firefly, a species over an inch in length, emits a very brilliant light, which comes from the sides of the head and beneath the thorax. The light is a fluctuating one and not the steady glow of the glowworm. A very remarkable fact is that this fluctuating or pulsating light may continue after the death of the animal. If we suppose that the light of the living insect is due to oxygen supplied under its control to the luminous matter we may conclude that after death the oxygen of the air might obtain access to it and produce a like effect. It is difficult, however, to account for the pulsations in the light of the dead firefly.

Camels for America.

Plans are being made to import a herd of camels for use in the mining regions of Nevada, and the Death Valley region of California. They will be used to transport the ore through the desert region to the smelting mills. It is believed the camels will thrive in the region and their usefulness to the mining people will be best understood when it is considered the average camel will shamble off at a forty-mile a day gait with 600 pounds on his hump, eat sage bush for his supper, and go without a drink for seventeen days.

Dialogue.

"Teacher, does cocoanuts really grow on trees?"
"Why, of course, Jacob," was the answer. "Where did you think they grew?"
"Why," said he gravely, "I thought the monkeys laid 'em." — London Globe.

January Weather Now and Year Ago

A comparison of the weather for the first 19 days of the present January and last January, shows a marked difference. It will be recalled that last winter was an unusually severe one, while this winter to date has been extremely mild.

1912—Average temperature was 17 1-6 degrees; 52 deg. hottest on the 18th; 16 deg. below zero coldest on 13th; rain on 3 days, 1 inch fell; snow on 11 days, 17 1-2 inches fell; sleet on 2 days.

1913—Average temperature was 40 1-5 deg.; 62 deg. hottest on the 16th; 22 deg. coldest on the 5th; rain on 13 days, 5.47 inches fell; snow on 2 days, 2 3-4 inches fell; sleet on 1 day.

S. S. CONVENTION IN STAUNTON.

The Sunday School convention of Green and Concord townships held in the M. E. church of Staunton, Sunday proved an interesting and beneficial session.

Representatives from all the churches of these townships were present.

Mr. Newton Rowe, president, presented "Punctuality" and "Do Conventions Pay?" provided topics for animated discussions, in which various representatives took part.

Musterole Better Than Mustard Plaster!

MUSTEROLE is oil of mustard combined with other simples used in home medicine. It is a clean, white ointment that you rub on—and the pain is gone! No plaster—no mess—no blister! It does all the work of the good old-fashioned mustard plaster, but does it better.

Millions of jars of MUSTEROLE are sold annually. Doctors and nurses recommend it to patients; it is constantly used in many of the large hospitals.

MUSTEROLE is what Twentieth Century science has made of the remedy that your mother and grandmother depended on. It gives instant relief from Sore Throat, Bronchitis, Tonsillitis, Croup, Stiff Neck, Asthma, Neuralgia, Headache, Congestion, Pleurisy, Rheumatism, Lumbago, Pains and Aches of the Back or

Joints, Sprains, Sore Muscles, Bruises, Chilblains, Frosted Feet, Colds of the Chest (it prevents Pneumonia).

At your druggist's—in 25c and 50c jars, and a special large hospital size for \$2.50.

Accept no substitute. If your druggist cannot supply you, send for 50c to the MUSTEROLE CO., Cleveland, Ohio, and we will mail you a jar, postage prepaid.

Tells how MUSTEROLE relieves:

Fred Gentner, Piqua, Ohio.—"For two years I suffered with rheumatism. The doctors treated me for different kinds of sickness. But did me no good. I read of Musterole, and began to use it at once. In a short time I regained the use of my limb."

IN SOCIAL CIRCLES

Mrs. Bertha S. Miller entertained the Monday Bridge club at one of the most attractive luncheons of the club season. It was a small table luncheon, characterized by exquisite appointments and culinary delicacies. Scarlet carnations and smilax in cut glass vases adorned each table and ferns in hanging baskets and jardinières added embellishment to the pretty dining room.

PERSONAL PARAGRAPHS

Mr. Robur Ogle made a business trip to Cincinnati today.

Mr. Heber McCoy went to Columbus Tuesday to hear Billy Sunday.

Deputy Treasurer A. W. Duff is in Jeffersonville collecting taxes today.

Miss Ruth Bitzer of Covington, Ky., is the guest of her sister, Mrs. F. C. Harlow.

Mrs. F. B. Creamer is visiting her mother, Mrs. Stephen Hickie in Hillsboro.

Mr. Conrad Switzer, Jr., of New York, is the guest of Mr. H. B. Dahl and family.

Miss Anna Denny, of Wilmington, is at the Hodson hospital for special treatment.

Mr. Frank L. Stutson spent Tuesday at the Stutson-Johnson store in Chillicothe.

Mr. D. L. Thompson is spending several days in Columbus on business this week.

Mrs. Bell Brown, of Madison Mills, visited her son, Mr. Tolen E. Brown and family today.

Miss Ella Allender, of Columbus, has been visiting Mrs. Wm. Hammer and family this week.

Mr. Mark Melvin is moving his family into the Pickering property on S. North street.

Mrs. Evans Hurtt and family are moving to the Engle property on Milwood avenue, which Mrs. Hurtt recently purchased.

Mrs. Will Trovillo and daughter, Katharine, of Roxabel, are spending the week with Mrs. Trovillo's father, Mr. A. T. Vincent.

Mrs. Robert Howat leaves Wednesday morning for Lynchburg, Va., to visit her daughter, Miss Jean, at the Randolph-Macon school.

Mr. T. M. Ustick left Tuesday morning for Asheville, N. C., to spend the remainder of the winter with his daughter, Mrs. Will Staubs.

Mr. Jacob Sexton left Monday for Cleveland where he has accepted a position. His family will remain here for the present.

Mrs. E. E. Ginn and daughter, Miss Helen, are visiting Mrs. Ginn's mother, Mrs. H. C. Irions and sister, Miss Katharine, in Columbus, this week.

Mr. Ed M. Tharp returned to Columbus Monday, leaving Mrs. Tharp and baby to spend the week with his parents, Mr. and Mrs. W. A. Tharp.

Hon. Humphrey Jones leaves tonight for State College, Pa., to make an address at the State Agricultural college on "The Silo and Cattle Feeding."

Miss Marie Jones has returned Hillsboro after a week's visit with Misses Gertrude and Edith Gardner.

Mrs. J. W. Rothrock returned Monday night from Columbus, where she has been visiting at the home of Mr. Tom DeBruin and attending the Billy Sunday meetings.

Class of 1913 Organization

The class of 1913, Washington C. H. High school has completed its organization as follows: President, Davis Edwards; vice-president, Ed Williams; secretary and treasurer, Miss Allee Parrett; class historian, Miss Jane Saxton; class lawyer, Miss Mary Tysor; class prophet, Miss Ruth Smith; class poet, Miss Sarah Holmes; class artist, Miss Anna Conner.

The office of class artist is created for the first time by the class of 1913. There are thirty-nine graduates in the class which is one of admittedly high standard and good work.

CHINESE WOMEN CAN'T DO WITHOUT THEM

Skirts For Boat Workers Absurd, Says Former Resident.

Chicago.—The edict of President Yuan Shih Kai compelling Chinese women to abandon trousers and China men to assume them, is called "absurd" and "impracticable" by Mrs. Mabel Corrigan Doak, wife of the former British resident of Penang.

"I wonder," said Mrs. Doak, "just what 250,000 boatwomen in China will do about this new order. Take Canton, for instance, with its swarming thousands of boatwomen, muscular, big boned workers, who carry on the river traffic in sampan and junk. These women certainly will never be able to work in shirt waists or kimonos, as the edict requires."

"How do you suppose the thousands of women carriers who coal ships in the eastern ports will be able to trot up and down the loading planks in skirts? Why, they would fall over themselves and each other. They need their trousers for practical reasons. The boatwoman in skirts will be a bedraggled and distracted creature."

WALKING ROUND THE WORLD.

A Lord Mayor's Scoutmaster Will Win \$50,000 if He Succeeds.

London.—C. J. Rington Taylor, son of a London solicitor and scoutmaster of the lord mayor of Cardiff's own scouts, has just started a bold attempt to walk around the world in an effort to win a wager of \$50,000 made among London friends.

The time allowed to him to complete his walk of 50,000 miles is five years, and one of the conditions of the wager is that he shall not receive help from any one during his long journey.

He is now plodding along the north Welsh coast performing odd jobs of various kinds—acting as painter, collier or glazier in turn. He will shortly start for America, having to work his passage.

MIDDIES CAN'T TURKEY TROT.

New Rules at Naval Academy Proof Against Latest Dances.

Annapolis.—Rules to insure proper deportment of the midshipmen at the United States naval academy dances have been promulgated, and the naval lads feel that in some particulars the enjoyment of their hops has been curtailed.

Midshipmen have been notified that if dances of recent origin are to be attempted left arms are to be held straight at all times and partners are to be kept at a distance of at least three inches at all times.

Supplementary to these rules is one which points out that in no case should midshipmen take the arms of their companions when escorting them to and from the dances or on other occasions.

TABLET TO TITANIC BAND.

Tribute Placed in Church as Result of Lady Garvagh's Appeal.

London.—Lady Garvagh, who issued the appeal for a tablet in memory of the Titanic bandmen, has successfully accomplished her mission, and the tablet, which is really beautiful, has been placed in the parish church at Southampton. On it are written their names, the date and the verse of the hymn they are supposed to have played last, "Nearer, My God, to Thee."

Above is the inscription: Erected to the memory of that heroic band of musicians of the Titanic who in the last hour of this mortal life, by self sacrificing devotion, sought to inspire and sustain in others the assurance of the life eternal.

Beneath is the text, "And the sea gave up the dead which were in it."

Miss Gould to Dine Bread-Liners. New York, Jan. 21.—Miss Helen M. Gould, who is to be married to Finley J. Shepard tomorrow, is to give a dinner on the night of her wedding to 1,000 "bread-liners" at the Bowery mission. She has always shown interest in the work of helping the unfortunate who come to the mission for aid and has always been ready to answer a call for help whenever the mission was in need.

CRAIG BROS

NORWAY WATCHBOYS.

Told the Farmers of the Approach of Schools of Fish.

It is common enough to see a boy watching cattle to keep them from straying, and in days not so very long gone by it was no unusual thing for a boy to be set to keep the birds off the crops; but a watchboy whose duty it is to keep a lookout for a school of fish and who sits in a sentry box sets upon stilts is not an everyday sight. This particular kind of watchboy is Norwegian, the scene of his labors being the shores of some fiord of his native land.

His little sentry box is made of wood and perched high upon posts. Here the lad sits, gazing out across the arm of the sea, using his keen eyes for the benefit of the farmers who are depending upon him to give the alarm when a school of fish shall appear. They work contentedly enough in their fields secure in their belief that their watchboy will let them know when it is time to reap a harvest from the sea instead of from the land.

When the signal is given they leave their work, throw their big nets over their shoulders and hurry off to their boats.

Sentinel boxes similar to those employed in Norway were in use among the fishermen on the shores of the Mediterranean, and it is supposed that the vikings brought back with them from some of their piratical raids the idea that has been put in practice ever since.

Oversensitive Consciences.

It is not worth the while to let our imperfections disturb us always. The conscience really does not, and ought not to monopolize the whole of our lives, any more than the heart or the head. It is as liable to disease as any other part. I have seen some whose consciences, owing undoubtedly to former indulgence, had grown to be as irritable as spoiled children, and at length gave them no peace. They did not know when to swallow their cud, and their lives, of course yielded no milk.—Thoreau.

British Coin.

The English sovereign weighs 123.274 grains, .916 fine, and, consequently it contains 113,001 grains of fine gold. The shilling weighs 87.27 grains, .925 fine, and thus contains 80,727 grains of fine silver. Bronze coins consist of a mixture of copper, tin and zinc. The penny weighs 145.83 grains. The standard of value is gold. Silver is legal tender up to 40 shillings, bronze up to 12 pence, but farthings only up to six pence. Bank of England notes are not legal tender.

Spread of the Movement.

Mrs. Kowler.—The last time I saw you, I think, you were attending a cooking school to learn how to make vegetable dishes taste like meat. Mrs. Crossway.—Yes, but the feeling against the trust is so strong now that we are learning to make vegetable dishes taste utterly unlike meat.

Steamer Strikes Monster Shark.

Washington, Jan. 21.—The Ward liner Havana, according to a wireless report, was halted on its course when 40 miles north of Jupiter light, on the coast of Florida, by a 30-foot shark which had collided with the ship's bow. When the vessel stopped it was found that the prow of the ship had struck the shark just about amidships, so that its head was on one side of the vessel and its tail on the other. Though still alive, it was unable to extricate itself until shoved out of the way by strong-armed men from the Havana's crew.

FUNERAL NOTICE.

The funeral services of Eva Magdalena Hendrich will be held Wednesday at 2 o'clock, sun time, at the residence of her father, Peter, on the Chillicothe pike. Rev. Campbell officiating. Interment will be made in Washington cemetery.

Knights of The Golden Eagle Benefit!

EMPIRE OPERA HOUSE

Colman's Photo Plays!

Thursday Night, January 23rd.

The Program Will Consist of

The Star of Bethlehem,

A THREE REEL THANHOUSER FEATURE AND

"The Greatest of These is Charity."

A One-Reel Thanhouser Picture.

The Star of Bethlehem is an artistic offering which has never been equaled in moving pictures. For the production of this wonderful subject 200 people were required. A month was consumed in preparation and \$8,000 expended before the actual taking of the picture was commenced. The characters, custom and dress of the large numbers of people acting the scenes, were required to be carefully studied and eminent theologians were consulted in order that the representation should be kept as close to the Biblical narrative and tradition as possible. Wherever it has been shown it has been highly endorsed by the clergy and press. Tickets are now being sold by the Knights of the Golden Eagle and the sales indicate packed houses for the benefit.

BARNETT'S GROCERY REAL GOOD GROCERIES

Just the best little whole wheat waffer you ever tasted. After it is baked it is spread with the finest creamery butter, salted and toasted in a hot oven, try them with cheese. 30c the pound

ABANDONS PLAN FOR TRACTION EXTENSION

George W. Baker Announces That Electric Road Will Not Be Extended From South Charleston This Year Owing to Lack of Interest Manifested By Those Looked To for Assistance.

The Springfield & Washington Traction road will not be extended from South Charleston to this city this year. Like all previous traction proposals for this city, it has vanished for the time being, and it may be years before the road is constructed.

"The only reason the extension will not be made is that the interests

in this city which were expected to take a certain amount of the bonds, failed to do so," said Mr. Baker, who has worked hard to bring about the extension, and did not meet with the encouragement here which he had expected and he has become thoroughly discouraged and has just announced that he will do nothing further for the present at least, toward extending the line.

Tuesday morning when interviewed by a Herald reporter, Mr. Baker stated that he had ordered all further work called off, and has also ordered the release of the \$100,000 in bonds subscribed in Springfield.

"It would require at least \$240,000 to make the extension," said Mr. Baker, "and if the amount asked of this city had been raised and a smaller amount along the line, I would have furnished the remainder and built the road, but the lack of interest shown here has completely dis-

couraged me, and I have quit. The present road is netting me a nice profit, and I will continue to conduct that as at present."

It is understood that the Washington Savings bank of this city agreed to take \$14,000 of the bonds, but the raising of further funds was slow work and not at all encouraging.

Mr. Baker is greatly disappointed with the result of efforts to raise the necessary amount of bonds, and feels that the guarantee placed behind the bonds was sufficient to prevent any loss to holders of the bonds, and was of the opinion that the road would have been a paying venture from the start.

The failure of the venture also means disappointment to a great many citizens who have long wished to see the extension of the road to this city.

MISS ELEANOR WILSON'S INAUGURAL DRESS

Norfolk, Va., Jan. 21. — President-elect Wilson is inaugurated in March his daughter, Eleanor Wilson, will wear a dress made from silk manufactured in Norfolk. This announcement was made after the annual meeting of the stockholders of the Andreae Silk company of this city. L. P. Andre Mottu, secretary of the company, stated that Miss Wilson was offered a silk dress in November when her father was elected president, and she was asked to designate the shade she desired. She chose the outside petal of an American Beauty rose, and the dress is now being made in New York. It will cost \$650 and will be delivered in February. The company has decided to name the shade of silk "Melrose," in honor of Miss Wilson.

Preparing For the Wedding.
Tarrytown, N. Y., Jan. 21. — Miss Helen M. Gould, her two little nieces who are to be flower girls at her wedding, her fiancé and Mr. Shepard's brother, arrived at Lyndhurst for the preparations for the wedding tomorrow. Decorators have been busy all day placing plants and flowers in position for the wedding. One of the presents Miss Gould will receive will be a silver gift, the gift of 257 girls of her sewing school, who contributed 10 cents each. It is suitably inscribed.

INTELLIGENCE OF THE FOX.

Apparently Able to Distinguish Between Real and False Dangers.

The intelligence of the fox is often shown by the way he refuses to be headed when he has made up his mind as to the safe course to take. The West Somerset have an excellent fixture at Klive, but it has one drawback—the sea is not far off, and foxes naturally often make for the cliffs, a secure refuge. A fox can be easily headed at times, but that is nearly always when to be seen would betray him to his enemies, the hounds and give them an advantage; but when if he makes his point the advantage is on his side, then nothing will turn him.

To return to the West Somerset at Klive; they found a fox, and the whippet, seeing that the fox meant to go to the cliffs if possible, started to head him off. The ground was open, and for half a mile the whippet and fox were taking parallel lines, the fox clearly meaning to slip by and find a refuge in the cliffs. The man turned the fox away at last, but in a short time the hounds lost him, and I believe he got back after all.

Again the master ranged up some of the field to prevent another fox going back into a certain covert. In vain whips were rattled against saddle flaps; the fox went right through the watchers and made his point. It is a thing I have often noticed both with stag or fox, that the quarry seems to distinguish between real and false dangers.—London Globe.

Germany is a country of Nimrods. There are, we learn, 600,000 sportsmen, which means one gun for every hundred people. Each year fall to the gun, on an average, 400,000 hares, 4,000,000 partridges, 2,000,000 thrushes, 500,000 rabbits, 190,000 deer, 145,000 woodcocks, 22,500 wild ducks, 25,000 pheasants, 13,500 deer, 15,000 quails, 13,500 ducks, 1,400 wild boards and 1,300 bustards. In weight this "bag" represents 25,000,000 kilograms, a kilogramme being 2 1/5 pounds. The monetary value is 32,000,000 francs, or £1,240,000. The sum received for licenses to shoot is 7,500,000 francs, or £1,500,000.—London Globe.

Indian Days.

Marks of Indian days may be found under many old oak trees in southern California, particularly in the mountain districts. It is not uncommon to discover a large stone or boulder with one flat side showing a little above the surface of the ground and with a hole as large as a quart saucepan in the center. In such holes the squaws crushed the acorns which were thereby ground into meal for food for the red men.

Overweights.

The excessive mortality of overweights has been published by life insurance statisticians, and the phenomenon must be considered in football discussions. It is now a proved fact that the men who are barred from the game are the ones who live the longest, and though mere length of life is no criterion of its usefulness, yet it is a fair assumption that the longest lived are the most vigorous and, therefore, the best brain workers.

The colleges are then spending the most money on the students who will give the least returns. Every now and then some ingenious fellow publishes statistics showing that students able to take part in sports outlive those too defective to take any part at all, as though that needed numerical proof.

The new statistics show that the healthy underweights excluded from football are fitter for survival in America than the overweights of the teams.—American Medicine.

\$100 Reward, \$100

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surface of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials. Address F. J. CHENEY & CO., Toledo, O. Sold by all Druggists, 75c. Take Hall's Family Pills for constipation.

Misplaced Sympathy.

He was a kind and benevolent old gentleman, who took much interest in little boys.

One day as he was walking along the street he stopped and looked with compassionate sympathy at a lad whose face bore clear evidence of having been in the wars.

"My poor little fellow," he said, patting the boy on the head. "I fear you've been fighting. You've got a black eye. Dear me, now, I'm really very sorry, I—"

"Never you mind about me," said the poor little boy. "You go home and be sorry for your own little boy. He's got two black eyes."—Human Life.

Removal Sale of Monuments

As I am forced to vacate my present quarters by Feb. 15th I will offer for sale until that time the largest stock of Granite and Marble Monuments, Markers, Etc., ever carried in stock in this city.

My prices on work which will be sold include all lettering, setting, etc., complete in cemetery, and will be erected as soon as the weather will permit.

The work which I have been turning out is superior to all others, as all work gets the same attention and must be first class before it leaves the shop. My pneumatic plant is known to be the best manufactured, and is the only pneumatic air plant in the city. All cutting, carving, lettering, etc., is done here just the same as it is done at the quarries, and with the same kind of tools.

Call early and make a selection.

An Error Located

The circulation department of the Columbus Dispatch has just issued a number of circulars in which the printers made an error. It is pointed out that to rural readers the Dispatch is offered for one year, with the Ladies' World and pictorial Review for \$2.40.

As this is the first time the Dispatch has ever been offered singly or in any combination for less than \$3.00, we called this morning by telephone and learned that the price of \$2.40 above mentioned should have been \$3.40.

The Herald Pub. Co. will send in orders at this price. Those who wish to secure The Daily Herald for one year in addition to the offer of the Dispatch, can arrange for all upon the payment of \$5.00. Those who prefer The Register and The Dispatch offer can have same by paying \$4.00.

NOTICE OF REMOVAL.

The undersigned have moved our law office to Room 14, Pavey building, where we will continue the practice of law.

GREGG & GREGG.

NEWTON D. BAKER

Cleveland Mayor Urges State to Create a Tuberculosis Division.

Copyrighted by Frank Moore, Cleveland

NEED STATE AID IN PLAGUE WAR

Secretary of Society Fighting Tuberculosis Gives Reasons.

BY ROBERT G. PATERSON, Ph.D.
Executive Secretary of the Ohio Society for the Prevention of Tuberculosis.

Voluntary efforts in fighting "The Great White Plague" in Ohio have reached their limit. In view of the magnitude of the problem and the insufficient funds that can be raised from volunteer sources it is apparent that some other method must be adopted, if the tuberculosis situation in this state is to be adequately met.

That the ultimate responsibility for providing the means and equipment to control and prevent the spread of tuberculosis rests upon our public authorities, both local and state, no one will deny. I believe that, so far as the state is concerned, the time has arrived in Ohio when it should assume the burden of the fight.

In co-operation with the State Board of Health and the Ohio State Medical association, we will present a bill to the legislature asking for an appropriation of \$25,000 in 1913 and a similar amount in 1914. This sum, while not large in comparison with such expenditures in other states, will enable the State Board of Health to establish within its present organization the necessary machinery for fighting tuberculosis, which will be strong enough to show results in the two year period. After that time, there should be no doubt as to what the future course of the state of Ohio should be in dealing with this disease.

Need \$25,000 a Year.

Should the appropriation of \$25,000 a year be made by the legislature to the State Board of Health for tuberculosis work, it is hoped that the State Board will create a Division of Tuberculosis within its present organization and place at its head a man specially trained in this field. The work of such a division would cover the notification of tuberculosis as a communicable disease, free examination of sputum, free disinfection, visiting nurses, and educational measures.

The first task of such a division should be to make the notification law effective and to undertake a vigorous educational campaign by means of exhibits, lectures, newspapers and circulars.

For tuberculosis is a preventable disease, and its extent can be greatly curtailed by educating the people of every community in the use of a few simple precautions. This has been definitely proven.

STATE CONTROL NEEDED

Dayton Editor Declares State Should Fight Ohio's Deadly Menace.

The Ohio Society for the Prevention of Tuberculosis, which has been valiantly fighting the terrible disease for more than 10 years and has accomplished wonders in educating the people to take care of themselves and in remedying conditions under which the plague thrives, is advocating a proposal to create a state Division of Tuberculosis.

State control of the fight against this deadly disease is badly needed. When a malady annually causes the death of more than 7,000 residents of the state, as tuberculosis does in Ohio, it is high time for the state to take a

hand in retarding the condition which fosters this.

Tuberculosis fighting has been reduced to a scientific basis. It can be done through proper education and instruction, and this costs money. The state can well afford to spend a few thousand a year in this field, and carry out the plans which the volunteer workers have been prevented from doing by a lack of resources.

It will be a poor sort of citizen who will oppose the appropriation of this small sum, when he knows that its proper expenditure will mean the saving of human life, and a material reduction in the sum of human misery.

—The Dayton Herald.

A Howard (Kans.) girl who was uncertain as to her exact age, as her father and mother were not agreed on the year of her birth, decided to go to the physician who "attended the case." He said: "Why, certainly, my dear girl. I'll go and examine my old books." When he came back to report he said: "I find your father charged with a girl baby born on the 'seventh day of April, 189—, and I also observe he still owes me for you."

Yankee Trade Abroad.

The conservatism of Austria-Hungary is a proverb, but Yankee invention and enterprise have been able to break through the old lines to a surprising degree. In the great Bohemia-Moravia Machine Works in Prague, of the 520 machine tools in service throughout the various departments and shops, 102 are of American origin. When we really get down to it we shall be selling to all the world.

Biggest Thigh Bone Found.

The first shipment of prehistoric bones collected by the German expedition in German East Africa, comprising forty-six large boxes, reached the Berlin Paleontological Museum recently. Reports from the explorers indicate that they have been highly successful in finding important specimens. One of the most treasured is a thigh bone which measures six feet eleven and three-quarter inches, as compared with the four feet eleven inches measurement of the corresponding bone of the American diplodocus. The African specimen is the largest femur in existence, it is claimed.

The explorers believe the African saurians were the direct progeny of those whose remains were found in Wyoming.—Times.

TRAIN FOR 1916 OLYMPICS.

College of Athletes Founded in France by Marquis de Polignac.

Paris.—Preparations for the next Olympic games are already active here, the athletes of France being determined that their country shall give a good account of herself in Berlin in 1916.

The training will begin next April at the College of Athletes, which is being founded by the Marquis de Polignac. The college will eventually be installed just outside of Paris, but meanwhile the marquis, who married a daughter of M. Pommery, the "champagne king," is placing at the college's disposition the Parc Pommery at Reims.

All official and amateur champions of France as well as those who are able to pass the difficult tests of the college will be eligible for a course of free training at the expense of the marquis, whose public spirited support of French athletics is earning widespread applause.

It is reported here that the Germans, who were greatly impressed by the American successes of last year, have already engaged Jack Donaldson, the Australian athlete, and E. R. Terry.

SIGH FOR OHIO FLESHPOTS.

American Workmen in Germany Object to Lower Standard of Living.

Berlin.—The members of the colony of eighty or ninety workmen's families recently imported from an Ohio manufacturing city for the purpose of instructing the German staff of an American factory are having an insight into the differences between German and American workmen's living standards. Families which at home were used to meat and dairy products once or twice a day find it entirely beyond workmen's purses to enjoy such "luxuries" in Germany.

Their German comrades are content with a daily diet of black coffee, oleomargarine, cheese, sausage and vegetables, with meat perhaps on Sunday. The Ohio families find it impossible to reduce their home standards to such a level and are correspondingly discontented with their lot here.

Great Britain sold more than 1,680,000 incandescent lamps to other countries in the first six months last year.

Great Change In Temperature

With a drop of 32 degrees in five hours, Monday evening, the cold wave thrust itself upon this city, supplanting the "blue bird" weather of Sunday and part of Monday.

Sunday, during the high temperature, blue birds and robins were out enjoying the spring zephyrs, and even the honey-bees left their winter quarters and darted forth in the sunshine.

The cold wave struck this city at 4:15 Monday evening, when the mercury stood at 60 degrees, and a sudden drop took place, and by nine o'clock the rain had changed to a swirl of snow and the thermometer stood at 28 degrees.

Tuesday morning it was 25 degrees as shown by Gossard's self registering thermometer.

Warmer weather is again predicted for tomorrow.

TELEPHONES—Home No. 137. Bell, Main No. 170.

WHICH WAY OUT?

Away across the broad Pacific ocean, south of the Japanese Empire, under the eaves of the great continent of Asia, cutting off that vast expanse of water which geographers have named the China sea—so far away that it is only Tuesday here when it is Wednesday there—in the far, far East—lie the Philippine Islands.

Those islands passed under the control of this nation as part of the consequences of the war with Spain.

The American people disagreed with Spain over the methods used by the Spaniards in governing Cuba, the "pearl of the Antilles". Cuba is but a short distance from the coast of Florida, so close in fact that American capital and American enterprise have built a railroad out over the Florida keys until it is but a step across to Havana.

Spanish misrule in Cuba was brought home to the American people forcibly—so forcibly that they could not sit idly by and see the Cuban people held in bondage under laws of the middle ages.

But what of the Philippines?

We guaranteed to the Cubans protection and promised them an independent government secure from molestation at the hands of other nations. But Cuba is here and the Philippines are a long way off.

The hope of being able to do the same thing for the Philippines was bright, ten or a dozen years ago, and energetic ambitious Americans were anxious at that time to do much for them after their oppressors were driven out and the Americans were also anxious to profit on their own account, while helping the Philippines on to a place among the civilized nations of the earth—and many then believed in their optimism that it could be done.

A dozen years of earnest effort, however, has resulted in the keenest disappointment.

The Filipinos—the majority of them—have demonstrated that they are a long, long way from being able to work out a stable government or even able to maintain one after it is formed for them.

The American people have satisfied themselves that the Philippine Islands can never be occupied permanently by white people. The climate forbids that.

Practically every sober thinking American has long ago settled in his own mind and conscience that the Philippine problem cannot be solved by a white man's control, that a government by the "Little Brown Men" is only a beautiful theory which cannot be realized; that no matter how we obtained the Philippines the problem is now how to get rid of them.

Japan wants the Philippines and the Japanese people can inhabit the islands—they are not in the white man's zone.

The question of what to do with the tropical islands is one of the first and one of the most serious which will confront the new president. His first duty is to see to it that this great nation deals justly with the Philippines and the second is to see to it that this nation is relieved of the expense and the annoyance of trying to look after them.

Few indeed are the Americans now, after ten years' experience, ambitious as they are to grow and expand, who believe that anything but trouble and annoyance can come of our continuing to hold the south sea hot house, where vegetation is unconquerable, where reptiles lurk in the forests and disease in the waters, where dwarfs and giants, in nature's garb, are still nature's untamed children.

How will the incoming administration deal with the Philippines?

Poetry For Today

OWNERSHIP.

Jim Bloggins bought a handsome horse—
A sorrel that could go;
He took great pride in it, of course—
His speech would fairly glow
When he was praising, in full mead,
That race horse, neat and trim;
Jim thought 'twas he that owned the steed,
But the horse was owning Jim.

Old Gotrox bought some Wall street stock,
Which paid great dividends;
He praised it hours, by the clock,
Among his weary friends;
He could not talk of aught beside
The thick cream that he'd skim;
The Wall street stock owned him.

Young Homeboy bought a bungalow,
On the installment plan;
There was no doubt, as such things go,
He was a happy man;
He talked of it in the morning light
And in the evening dim;
He thought he owned the house, all right
But Homeboy's home owned him.
—Denver Republican.

BUCKEYE STATE HAPPENINGS

Militia Cost To Be Probed.

Columbus, O., Jan. 21.—Cost of maintaining the state militia, which is alleged to have quadrupled in the last 15 years, is to be probed by a joint committee of the senate and house of representatives if a joint resolution offered by Senator Gregory of Hamilton county is approved. Governor Cox, while recognizing the necessity of an efficient National Guard, has said he could not see the necessity for the expense of maintenance being so much greater in proportion than that of other state departments.

Election Officials Organize.

Columbus, O., Jan. 21.—Meeting of the executive committee of 18 here brought to light the fact that members of county boards of elections a month ago, by correspondence, formed a state organization of deputy state supervisors of elections, of which John J. Joyce of the Franklin county board is president and Harry B. Mings of the same board is secretary.

Two Attendants Dropped.

Columbus, O., Jan. 21.—Two attendants employed in the open ward at the Columbus state hospital, in which John Barnhart, a patient, was fatally assaulted, were discharged by Superintendent C. F. Gilliam. No charges were preferred against them. Oral Best, the accused attendant, awaits in the city prison the investigation which Coroner Benkert will conduct.

Health Officers to Meet.

Columbus, O., Jan. 21.—Health officers and representatives of the local

boards of health from all over the state will be in Columbus Thursday and Friday to attend the thirty-fifth annual conference of the state board. The conference will be held in the auditorium of the public library. Governor Cox will deliver the address of welcome.

Despondent Man Kills Wife.

Cincinnati, O., Jan. 21.—In a fit of despondency Richard A. McCarty, a bookkeeper, shot and killed his wife in their home in Norwood, O., attempted to shoot his two young sons and had intentions of committing suicide, but was intercepted by his father. He was arrested.

Cincinnati Merchants In Jamaica.

Kingston, Jamaica, Jan. 21.—A large party of merchants of Cincinnati will arrive here next week. The visitors will meet local traders and will hold conferences with them with a view to increasing the trade between their city and the island of Jamaica.

Medical College Gets \$125,000.

Cincinnati, O., Jan. 21.—A donation of \$125,000 to the endowment funds of the Ohio-Miami Medical college of the University of Cincinnati was announced, but the name of the donor was not made public.

Illness Cause of Suicide.

Coshocton, O., Jan. 21.—Charles Honabarger, 28, shot and killed himself at his home near Bakersville. Ill health and a misunderstanding with his wife are believed to have unbalanced his mind.

Would Protect Creditors.

Columbus, O., Jan. 21.—Merchants who would evade their creditors by disposing of their stocks will run against a stumbling block if a bill which Senator Haas of Delaware introduced in the senate becomes law. Before a merchant can sell his goods in bulk he must, at least five days previous to making the sale, notify all his creditors of his intention to sell and to whom the sale is to be made. He also must furnish the purchaser a list of all his creditors, together with the amount of their claims. Violation of these provisions makes the sale void.

For State Office Building.

Columbus, O., Jan. 21.—Senator M. E. Beman of Gallia county, chairman of the state buildings committee, introduced a bill authorizing the state to condemn property in Columbus for the erection of an office structure to accommodate the many state offices which now are housed in outside buildings. It calls for an appropriation of \$1,200,000 to cover the total expense of land purchase, erection and equipment.

Minimum Wage Proposal.

Columbus, O., Jan. 21.—The minimum wage proposal and the contemplated reform of the public school system, two of the recommendations of Governor Cox in his message, are to get no further at the present session than commitment to investigating commissions, according to an announcement by Speaker Swain.

Move Made To Abolish Congressional Record Work

Washington, Jan. 21.—Declaring "there was too much hot air" at both ends of the Capitol, Representative Bates of Pennsylvania introduced a resolution to discontinue publication of the Congressional Record, which chronicles every word of congressional debate. He said if there was no way in which the legislators' views were given public circulation, debate would be shortened, legislation speeded and the government saved a vast sum.

Nervous Debility Is Easily Overcome

Tona Vita Builds Up Run-down People Very Quickly.

If you have a worn-out, miserable feeling, from morning till night; if your food does not nourish you properly; if you have little ambition and tire very easily, you are debilitated and run-down, and need something to build you up.

This, Tona Vita will do in a few weeks' time. It is a remarkable medicine and is pronounced by most physicians the best tonic now being sold to the public.

Give this great tonic a trial. No matter how badly you are run down you will notice an improvement at once. In a few weeks you will feel as though you had been made over.

If you have lost flesh get on the scales after taking Tona Vita a week, and see how your weight has increased.

Tona Vita is sold by Brown's Drug Store.

BUILD STRENGTH ANEW

At this season many are "run down" or suffer from the effects of lingering coughs, colds, etc. The unnatural lives we lead and changing weather conditions tax strength and vitality.

NYAL'S TONIC

gives just the help most needed. A delicate preparation that imparts new vim and renews the disease-resisting forces of nature. Agreeable to everyone, and helps at once.

Curiosity the Common Bond Between Woman and the Monkey

By Dr. R. L. NICHOLSON, Anthropologist

CURIOSITY IS THE COMMON BOND BETWEEN WOMAN AND THE MONKEY.

When one approaches a cage of monkeys the curious little simians flock to the bars and examine him from head to foot with the most avid curiosity. This same thing is true of women. They are CONTINUALLY PRYING INTO THINGS and can supply an ENDLESS STRING OF CHATTER about everything they see.

I do not say that woman resembles the monkey physically any more than does man. It is only a MENTAL SIMILARITY. That part of the woman's head called the "curious bump" is proportionately the same as that of the monkey.

It will take several THOUSANDS OF YEARS FOR WOMEN TO LOSE THIS STRIKING RELATION TO SIMIAN LIFE. Woman, however, has other virtues which make up for this very bad characteristic. She has made herself firmer in character than her male consort. This evil of curiosity has been fully overcome by these redeeming features.

Monkeys talk among themselves just as do women. When they see something which strikes them they chatter and chirp in their language.
